SKILLS

FRONT-END

React.js
Tailwind CSS
JavaScript

BACK-END

Node.js & Express
MongoDB
Python
PHP & MySQL

TOOLS & OTHER

REST APIs
JWT Auth
WebSockets
Git

EDUCATION

BS SOFTWARE ENGINEERING

University of Gujrat, Pakistan
2023 – Present

DIPLOMA — ELECTRONICS ENG.

Govt Swedish Pakistani College
Completed 2023

LANGUAGES

English
Urdu

SUMMARY

Full Stack Engineer specializing in MERN stack, scalable backend systems, and enterprise web architecture. Builder of prison management platforms, simulation systems, and real-time competition tools.

EXPERIENCE

Full Stack Developer Intern | CodeAlpha (Ministry of MSME)

Jun – Jul 2025 · Remote

Built full-stack MERN applications, developed responsive UI components, integrated backend APIs, and managed version control in a collaborative remote team environment.

Freelance Full Stack Developer | Self-Employed

2024 – Present

Delivered client web solutions using MERN stack. Built JWT authentication systems, designed scalable REST APIs, created responsive UIs, and automated workflows with Python scripts.

PROJECTS

Qafas360 (Enterprise Prison Management)

Tech Stack: React, Node.js, MongoDB, Tailwind

Enterprise prison management system with multi-role access (Admin, Staff, Visitors, Lawyers), JWT security, analytics dashboard and reporting.

DevBattle (Real-Time Coding Platform)

Tech Stack: React, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS, JWT, Redis, Cloudinary, Vite

Real-time coding battles and learning platform built with MERN and WebSockets. Enables software houses to train and hire developers through skill-based challenges. Includes matchmaking and global leaderboards.

My Café (Restaurant Management)

Tech Stack: PHP, MySQL

Restaurant management system with order management, inventory tracking, billing system and admin dashboard.
